

# Brush & Floss on the Go

Maintain your Teeth now in a Pleasant way

## Total Convenience

This toothbrush has been developed to brush teeth more often than we do on average. It was developed by a Dutch dentist who combined brushing teeth with pleasure to promote healthy long life-teeth. Young and old now use this brush for healthy teeth.

## Gingivitis

Various tests and studies indicated that gum infections will disappear due to improved blood flow by better brushing and flossing. Daily gentle gum massage will prevent development of gingivitis.

## No water required

This new "chewing-gum-brush" does not require your hands or water. It can be chewed like chewing GUM and because of the Xylitol and the minty taste, the production of saliva is increased, which prevents a dry mouth and dry gums.

## The Advantages:

- "Gingivitis" is mainly caused by a combination of insufficient brushing and flossing resulting in poor blood flow to the gums.
- Infected gums can be the cause of reduced general health.
- The Brush & Floss cleans teeth and massages the gums, activates optimal blood flow.
- It's very pleasant to do. (Such as chewing a piece of gum)
- Gingivitis is now easy to cure and prevent with the unique "Chewing-Gum-Brush", and it works within days.
- Even after a first use you will notice a big difference. Your teeth feel clean and fresh. By regular use this condition will stay over time.
